

The surface version with trimless view. Using the special suspension bracket for HIGH or LOW SYSTEM profile get a unique option of a trimless profile. With the diffuser position in the same level with the ceiling, gives the impression of an almost immaterial luminaire fully integrated to the ceiling.

This architectural advantage, in combination with the perfect lighting conditions without annoying reflections, make the TRIMLESS HIGH SYSTEM suitable for many different working areas (offices, houses, entrance areas etc).

It escapes also the restrictions of the T16 fluorescent lamps, by using LED lighting points that can have any spacing pitch and this gives the light line enormous flexibility. The visual benefit: The continuous-row system is illuminated absolutely uniformly from beginning to end, is economically efficient, maintenance free and it has long service-life.

- Metal suspension bracket.
- Required 1pc per 1m profile length.

Code	Description	Kg
900250	Suspension Bracket High System Surface-Trimless	0,470
900260	Suspension Bracket Low System Surface-Trimless	0,470

For luminaires codes you have to look up at “SURFACE & PENDANT LUMINAIRES” category.
