

HIGH SYSTEM TRIMLESS

PROFESSIONAL RECESSED LUMINAIRES

The trimless version of HIGH SYSTEM, with the diffuser position deeper from the ceiling level, gives the impression of an almost immaterial luminaire fully integrated to the ceiling. This architectural advantage, in combination with the perfect lighting conditions without annoying reflections, make the Trimless High System suitable for many different working areas (offices, houses, entrance areas etc).

It escapes also the restrictions of the T16 fluorescent lamps, by using LED lighting points that can have any spacing pitch, and this gives the light line enormous flexibility. The visual benefit: The continuous-row system is illuminated absolutely uniformly from beginning to end, is economically efficient, maintenance free and it has long service-life.

Technical Features

- Housing from aluminium profile, painted electrostatically in selected colour.
- High efficient diffuser in opal PMMA.
- Flow recuperator in white colour.
- Pure light without IR/UV radiation.
- Efficient thermal management.
- Operation life: 50,000 hours with efficiency > 80% of the initial luminous flux (L80B10).
- Connection for operation on 230V/50Hz.

Upon request:

- Connection for emergency lighting system, for one or three hours.
- Version with microprismatic opal cover.
